

# Testing guide

Let's discover together the 0.28 alpha version of Decidim!

## What are the objectives of the event?

Our objectives for this event are to hunt out mainly **design bugs** and **UX/UI inconsistencies** of this alpha release before Decidim 0.28 is released as a stable version. If you find other bugs during the review, please report them as well so we can check them!

## How much time do we have to do this?

The event will be 2 hours long and will be divided into the following sections:

- 10 minutes - Quick presentation of the event, participants and testing guides ;
- 90 minutes - Bug hunting ;
- 20 minutes - General feedback about the new design.

## What do I need to test?

You can find the spaces you need to test in the second page of this document:

 Participants registered

Each participant has been assigned a Decidim space (process, assembly, etc.) to test. Once you're assigned a space, click on the link of the space and start testing!

*Don't forget to test the design in **desktop** and **mobile** versions!*

## Where can I perform testing?

To start testing, go to the dedicated Decidim installation : <https://alpha.try.decidim.org/>. Create an account, and confirm your email address with the letter\_opener page : [https://alpha.try.decidim.org/letter\\_opener](https://alpha.try.decidim.org/letter_opener). You can then finalize the creation of your account by clicking on the link contained in the account confirmation email associated with your email address.

## Where do I report bugs and inconsistencies?

We created a dedicated GitHub project : <https://github.com/orgs/decidim/projects/16/>.

You'll be able to create draft issues, following these steps:

1. Click on an empty row to create a new draft and type the title.
2. Write the bug report by copying and pasting this template: <https://gist.github.com/carolromero/a2155a0c92f099699c86c5e33d46991f>.
3. Fill in the following fields:

- Type of feedback
  - 🖋️ Design: use this label to report any design flaw you encounter in the user interface.
  - 😊 UX: use this label if you identify usability problems while doing a task.
  - 📄 Copy: use this label if you find any text errors or typos.
  - 🐛 Bug: use this label to report any other regular bug.
- Reporter
  - Your GitHub username.

## Where can I ask questions to the organizers?

Facilitators will be connected to the videoconference, and available by chat on the [Release party Element channel](#). If you don't find your answer here, please ask us directly!

## Why can't I access the back-end?

In each of those spaces, components are enabled, with different configurations. We already designed the alphas platform to enable every possible configuration in every possible space.
