# **Executive Summary**

This document details the tasks carried out in 2022 in relation to the project presented to the Government of Catalonia by the Free Software Association Decidim within the framework of the Agreement signed on February 17, 2021, together with the Barcelona City Council, titled "Framework Collaboration Agreement between the Barcelona City Council, the Department of Foreign Action, Institutional Relations and Transparency of the Government of Catalonia, and the Free Software Association Decidim for support to the Decidim project and its community." It serves as a record of the tasks performed within this project. To facilitate understanding, a glossary with specific technical terminology is initially provided. The following section contains the list of tasks completed, divided into Maintenance and New Developments categories. Within the Maintenance category, to aid understanding, the tasks are organized into three subcategories: development coordination, documentation, and translations. In the New Developments category, there are subcategories for SPAM reduction and replacement of the WYSIWYG editor Quill with the TipTap editor. Lastly, there are annexes that provide support for the rest of the sections, with details of each action performed.

# Glossary

Since this project involves a high degree of technical complexity, a glossary of project-specific terminology is provided to facilitate reading this report.

Concept Definition GDPR GitHub. Metadecidim Quality Assurance Ensuring the quality of a product or service through systematic measurement, monitoring, and feedback loops. Quill Spam Initially, unsolicited email sent to a large number of recipients for advertising or commercial purposes. The same term is used for any unsolicited content that meets these characteristics and is published on websites. TipTap A "headless" rich text editor, independent of frameworks and extensible. WYSIWYG

Tasks Completed Maintenance Development Coordination

Concepte	Definició
GDPR	General Data Protection Regulation (GDPR) (Regulation (EU) 2016/679) is a European regulation aimed at strengthening and unifying data protection for all European Union (EU) countries, also controlling data transfer outside the Union. In the case of Spain, its adaptation was carried out within the framework of Organic Law 3/2018, of December 6, on the protection of personal data and guarantee of digital rights.
GitHub	An online platform that aids in code development and provides version control services.
Issues/User Stories	Task management system. In the case of Decidim, it is located within the GitHub project.
Metadecidim	Decidim community platform where the project's governance takes place.
Pull Request	A proposal to contribute to the code repository.
Progressive Web App	A progressive web application, a type of application distributed through the web, using common web technologies.
Quality Assurance	Ensuring the quality of a product or service through systematic measurement, monitoring, and feedback loops.
Quill	According to its documentation: Quill is a modern WYSIWYG editor designed for compatibility and extensibility.
Spam	Initially, unsolicited email sent to a large number of recipients for advertising

	or commercial purposes. The same term is used for any unsolicited content that meets these characteristics and is published on websites.
ТірТар	A "headless" rich text editor, independent of frameworks and extensible.
WYSIWYG	An acronym for "What You See Is What You Get." In the context of programming, it refers to text editors that display the final result on the screen.

# Tasks Completed

#### Mantainance

#### **Development Coordination**

This category consists of:

a) Coordinating code developments carried out by different administrations or entities. We provided guidance to ensure that all contracts made by organizations adopt Decidim software, guaranteeing the delivery of outputs aligned with the platform's objectives and technical and legal requirements, to facilitate their subsequent integration into the official repository.

b) Coordinating and organizing the path and subsequent implementation of improvement proposals, new developments, and new functionalities received on the community platform, meta.decidim.org, at the functional level.

c) Defining user stories for new development tasks by the signatories of the agreement, provided that these functionalities have been approved by the Decidim Product team.

Within this group of tasks, the following projects can be highlighted:

 Monitoring and subsequent completion of part of the development of functionalities related to improving GDPR compliance and privacy of personal data for platform users. This project was contracted by the Barcelona City Council within the framework of the tender titled "Maintenance and Evolution Services for Decidim-based Software Applications (AM)" of the Area Management of Culture, Education, Science, and Community of the Barcelona City Council, with sustainable public procurement measures"<sup>1</sup>. In the case of this development, it involves the functionalities described in the

<sup>&</sup>lt;sup>1</sup> Project available at <u>https://github.com/decidim/decidim/projects/24</u>

"Identified Enhancements" (Annex 3), specific to the generic Decidim software. Apart from refining user stories, tasks were carried out for Quality Assurance of the developments, as well as code review. Finally, follow-up meetings were held with the provider (Fundación Goteo).

- 2. Monitoring and subsequent completion of part of the development of functionalities related to the **Progressive Web App** (PWA) for the Barcelona City Council, within the framework of the tender titled "Contracting of services for the development of evolutionary enhancements of functionality and participatory experience of the decidim.barcelona platform, with sustainable public procurement measures"<sup>2</sup> In the case of this development, it corresponds to Lot 2 of this contract, titled "Decidim Progressive Web App." In addition to refining user stories, tasks were carried out for Quality Assurance of the developments, as well as code review. Finally, follow-up meetings were held with the provider (Populate Tools S.L.).
- 3. Monitoring the development of the **platform redesign**, contracted by the Barcelona City Council within the framework of the tender titled "Contracting of services for the development of evolutionary enhancements of functionality and participatory experience of the decidim.barcelona platform, with sustainable public procurement measures."<sup>3</sup> In the case of this development, it corresponds to Lot 3 of this contract, titled "Decidim Participant Experience." Mainly, follow-up meetings were held with the provider (Populate Tools S.L.) and feedback was provided to the Product team regarding the technical implications for decision-making.

Regarding the received improvement proposals on the community platform, periodic participation has been made in the process of **receiving new functionalities** in Metadecidim<sup>4</sup>. Within this process, it is worth mentioning the response to improvement proposals with the support of the Decidim Product team. A total of 27 proposals have been addressed, of which 18 have been fully implemented (i.e., with code introduced into the main repository), 7 are awaiting the corresponding improvements by community developers, and 1 has been rejected. A detailed list of these proposals can be found in Annex I: New Functionality Proposals by Status.

<sup>&</sup>lt;sup>4</sup> Available at <u>https://meta.decidim.org/processes/roadmap</u>

Furthermore, regarding the tracking of developments and contributions to the project, it is worth mentioning the **code improvements** made to the repository where all the software development is located by the Association. In technical terms, this is referred to as a Pull Request, and a total of 91 contributions have been made, of which 89 were accepted, resulting in an acceptance rate of 97.80%. A list of all these contributions can be found in <u>Annex II: Pull Requests submitted to the main repository.</u>

On the other hand, another activity carried out periodically is the **creation of new issues**, which can be for new functionalities or bug fixes. A total of 11 reports of this type have been created, available in Annex III: Issues created in the main repository.

Another periodic task is the **triaging of new issues (bugs)**, which involves receiving, conducting an initial review, and verifying whether the error can be reproduced in the latest development version, as well as categorizing its severity. A total of 46 issues have been reviewed, providing feedback on each of them, and they are available in Annex IV: Issues commented on in the main repository.

An important part of the development is the reception of contributions by **reviewing Pull Requests**, verifying the proposed functionality or correction. In this regard, it is worth highlighting the comments made on a total of 264 Pull Requests, providing feedback to the contributors. These can be found in Annex V: Pull Requests commented on in the main repository.

#### Documentació

This category consists of improving and maintaining the project's documentation site<sup>5</sup>, as well as coordinating and supervising contributions to the documentation.

This year, it should be noted that only minor and specific improvements have been made to the main documentation repository, as well as configuring the ability to display multiple versions of Decidim within the official documentation website of the project, in preparation for the radical change of this site with v0.28, which will feature the platform redesign.

<sup>&</sup>lt;sup>5</sup> Available at <u>https://docs.decidim.org</u>

#### Traduccions

In recent months, a total of 29 translation contribution requests have been received for the project, and all of them have been approved. The requests per language are shown below. It should be mentioned that a single translator may have multiple languages, and it is possible to request to contribute and ultimately not make any contribution.

Language	Amount
French	5
Baque, German,	3
Italian, Valencian, Norwegian, Arabic, Spanish, Mexican (Spanish), Lithuanian.	2
Catalan, Swedish, Polish, Portuguese, Brazilian Portuguese, Spanish (Paraguay), Greek.	1

#### New Developments

#### Reduction of SPAM

In recent years, we have observed an increase in users and "spam" content on Decidim-based platforms.

The term "spam" refers to unwanted or irrelevant content in technical and colloquial English. That is why the Association has been working to address this issue through various mechanisms and improvements, as there is no single solution that can solve all the problems. However, each of these features can help improve the overall moderation experience and reduce the time that spam content remains on the platforms. You can find these user stories in the following table:

Issue ID	Títol
10033	Templates justification when blocking a participant
10034	Integrate "reported participants" in Global moderations
10035	Pending moderations in admin dashboard
10036	Add direct action to hide this content
10037	Add direct action to block this participant
10038	Use content classification systems for better SPAM detection

In terms of documentation, a selection of screenshots of these features can be found in <u>Annex VI:</u> <u>Screenshots of the SPAM Reduction development.</u>

At the time of writing this report, the development of these features is in a functional and technical review state, meaning it is available in a testing environment and is expected to be incorporated into the 0.28 release.

#### Replacement of the WYSIWYG Editor Quill with the TipTap Editor

Decidim has relied on the WYSIWYG Editor Quill since its early versions released in 2016. While the editor has worked relatively well, it has become a maintenance burden and a problem for future developments because official maintenance of this editor ended around 2019 when the last version of the editor was published. The editor still receives fixes in its GitHub repository, but it appears that the original developer is no longer actively working on the project, which is likely why there have been no official releases since that year. Along with the lack of official maintenance, the editor has also introduced several technical issues to Decidim while attempting to improve the editing experience or create additional features related to text editing. Development efforts to enhance the editor experience have led to maintaining a partially forked version of the original editor within the Decidim codebase.

Therefore, in 2021, a study was conducted on migrating to another editor. The community reached a consensus to use another editor called TipTap, and the Association has coordinated this development with the following user story:

Issue ID	Títol
10082	Migrate from QuillJS to Tiptap Editor

In terms of documentation, a selection of screenshots of these features can be found in Annex VII: Replacement of WYSIWYG Editor with TipTap Editor.

At the time of writing this report, the development of these features is in a functional and technical review state, meaning it is available in a testing environment and is expected to be incorporated into the 0.28 release.

#### Voting Module using the Vocdoni Protocol

Vocdoni, a digital voting project, proposed a collaboration to integrate Decidim with their protocol. This collaboration has allowed us to create an electronic voting module that integrates with Vocdoni's API and SDK. Vocdoni is one of the first universally verifiable open-source protocols for digital voting, thanks to its use of blockchain technology.

The following are the main tasks carried out during the first phase of the project:

The module has been divided into two components:

- An interface has been developed for managing elections and voter registries, as well as configuring questions and answers and previewing them. This interface is aimed at organization administrators, providing them with complete control over the voting process and ensuring efficient management of the voter registry and questions.
- 2. An interface has been created to allow participants to vote, view results, and verify their vote. This interface has been designed to be user-friendly and accessible to all voters, ensuring transparency and integrity in the voting process.

To ensure the security and integrity of the data stored on the blockchain, a backup system has been integrated, allowing for the creation of backups and restoration of stored accounts. This has provided an additional layer of protection and ensured data availability in case of system loss or failure.

Regarding the module's functionalities for organizations, the following features have been successfully implemented:

- I. Organizations can create native accounts on the blockchain to interact according to Vocdoni's API specifications.
- II. Organizations can view the number of available credits for creating votes, facilitating the management of the voting budget.
- III. The creation of simple response votes has been implemented, following the logic of the Vocdoni Protocol, allowing organizations to define questions and answer options in a simple and intuitive manner.
- IV. Organizations can choose to display either public or encrypted results until the end of the voting process, based on the preferences and needs of each election.
- V. Organizations can dynamically manage votes according to defined electoral cycle state specifications, ensuring full control over the voting process.

Memòria anual 2022 Associació de Software Lliure Decidim

The module is published on the GitHub code-sharing platform<sup>7</sup>.

During 2023, the tasks corresponding to the second phase of the project will be executed.

<sup>&</sup>lt;sup>7</sup> Disponible a <u>https://github.com/decidim-vocdoni/decidim-module-vocdoni</u>

## Annexes

#### Annex I: Proposals for new functionalities by status

Table with the relationship between the proposals submitted by the community that have received a response and the status provided by the Decidim Product Team within the "Propose new functionalities" process in Metadecidim<sup>8</sup>.

ID proposal	Tittle	State
17111	Change "change password" process to make user retype current password	evaluating
17032	En una encuesta puede haber una primera pregunta que la cierre entera	accepted
17110	Allow users to translate their new initiatives in local languages	rejected
17029	Add nickname autofilling to the sign up form	evaluating
17026	Add show password option on sign in, sign up and forgot password forms	evaluating
16981	"Continue" or "Submit" takes the user to the top of the page	evaluating
16948	Ability to navigate between proposals	evaluating
16935	Allow configuring an "after vote popup" for the budgets component	evaluating
16934	Show a guidance modal in PB voting after selecting the first project	evaluating
16966	Hide picture, bio and personal url for blocked users, even for logged in users	accepted
16922	GDPR Compliance - Automate deletion of inactive users' accounts	accepted
17028	Improve the email confirmation user flow	accepted
17027	Add instant input validation on authentication forms	accepted
16942	Allow assembly admins administer children assemblies	accepted
16954	Group actions for budgeting projects admin	accepted
16974	Review Admin Log notifications	accepted
16968	Add initiative creation in the authorization parameters	accepted
16983	Let admins choose the default order of appearance of the initiatives	accepted
16965	Improvements on decidim-accountability module	accepted
16969	Rename Data Portability to Download your data	accepted
16970	Cookie policy: accept and reject	accepted
16976	Allow the owner of a User Group to remove themselves from the group	accepted
16938	Add notification setting for reported users	accepted
16950	Automate phase change in processes	accepted
16975	Strong password policy for Admin users	accepted
16973	Filters on Admin Log for improving auditing	accepted

<sup>&</sup>lt;sup>8</sup> Disponible a <u>https://meta.decidim.org/processes/roadmap</u>

## Annex II: Pull Requests submitted in the main repository.

Table with the list of Pull Requests submitted to the main repository by the Association employee, Andrés Pereira de Lucena, through his GitHub profile (andreslucena).

PR ID	Tittle	State
9931	Improve RSpec configuration	MERGED
9919	Bump version for Antora on v0.26	MERGED
9918	Bump version for Antora on v0.27	MERGED
9917	Make documentation site work with multiple versions	MERGED
9916	Bump versions on install docs	MERGED
9910	Exclude malformed file from codeclimate configuration	MERGED
9907	Show only ToS acceptance when admin hasn't accepted it	MERGED
9905	Make initiatives order translatable	MERGED
9904	Add missing active actions on admin navigation menu	MERGED
9896	Fix user sign up with invalid name	MERGED
9895	Remove duplication of LastActivity queries	MERGED
9893	Rename IgnoredMethods to AllowedMethods in Rubocop configuration	MERGED
9892	Add missing i18n key in Initiatives	MERGED
9891	Reformat CSV help for import files on Accountability and Proposals	MERGED
9886	Make Metadecidim naming consistent	MERGED
9871	Fix superposition in admin's error forms	MERGED
9863	Fix importing a page component without a body	MERGED
9833	Remove unnecessary line in push notifications spec	MERGED
9798	Add missing character on ActiveStorage documentations' code block	MERGED
9585	Fix budgets seeds on non development apps	MERGED
9579	Fix resource endorsed notification with Debates	MERGED
9576	Return 404 when there isn't a valid component in program	MERGED
9573	Backport 'Fix email subject when participatory space title is present' to v0.26	MERGED
9566	Add relevant URLs metadata to gem specs	MERGED
9557	Prevent showing announcement on meetings registrations	MERGED
9555	Add step-by-step instructions of the Crowdin releases process	MERGED
9551	Disallow creating grandchildren results	MERGED
9550	Fix absolute urls on 'managed user error' event	MERGED
9549	Add help text for proposals' 'publish answers immediately' setting	MERGED
9545	Replace social-share-button gem with social share services API	MERGED
9543	Fix for initiative mailer when promoting committee is disabled	MERGED
9542	Use public link on initiatives mailer	MERGED
9541	Backport 'Add short format to result date' to v0.27	MERGED

9540	Backport 'Add short format to result date' to v0.26	MERGED
9539	Backport 'Fix email subject when participatory space title is present' to v0.26	CLOSED
9538	Backport 'Fix email subject when participatory space title is present' to v0.27	MERGED
9537	Backport 'Fix cache hash on Highlighted spaces' to v0.27	MERGED
9536	Backport 'Fix cache hash on Highlighted spaces' to v0.26	MERGED
9535	Backport 'Advertise users if BB connection is lost in trustees/admin zones' to v0.26	MERGED
9534	Backport 'Advertise users if BB connection is lost in trustees/admin zones' to v0.27	MERGED
9533	Backport 'Add the rexml gem as a requirement for Ruby 3.0.0+ compatibility' to v0.27	MERGED
9532	Backport 'Fix nested attributes model mapping' to v0.27	MERGED
9531	Backport 'Fix background-image URLs with weird characters' to v0.26	MERGED
9530	Backport 'Fix long word breaking on comments and cards' to v0.27	MERGED
9529	Backport 'Fix long word breaking on comments and cards' to v0.26	MERGED
9528	Backport 'Fix hardcoded hour in election dashboard' to v0.26	MERGED
9527	Backport 'Prevent users to validate nicknames/emails taken by user groups' to v0.26	MERGED
9526	Backport 'Fix email subject when resource title has special characters' to v0.26	MERGED
9525	Backport 'Make sure component is published when starting an election' to v0.26	MERGED
9524	Backport 'Fix rollback questionnaire answer when file is invalid' to v0.26	MERGED
9523	Backport 'Return 404 when there isn't an initiative' to v0.26	MERGED
9522	Backport 'Remove description from questions in elections' to v0.26	MERGED
9521	Backport 'Capture unhandled errors from JS promises and inform the user' to v0.26	MERGED
9520	Backport 'Fix / Expose createMapController properly to let overriding' to v0.26	MERGED
9514	Remove margin-bottom on votings navigation	MERGED
9513	Update PR template with redesign guideline and drop "Checklist" section	MERGED
9510	Fix creation notification when editing a comment	MERGED
9509	Fix published conferences order	MERGED
9505	Fix order when filtering Meetings	MERGED
9501	Add boilerplate structure to CHANGELOG	MERGED
9497	Refactor CHANGELOG for v0.27	MERGED
9484	Backport 'Fix cache when changing background image on homepage's Hero's cell' to v0.26	CLOSED
9483	Backport 'Fix cache when changing background image on homepage's Hero's cell' to v0.27	MERGED
9482	Fix default seeds on first login (password_updated_at and accepted_tos_version)	MERGED
9481	Disable parallel specs for elections' system admin Cl	MERGED
9476	Backport 'Fix rubocop offences' to v0.27	MERGED
9475	Backport 'Fix the HERE geocoding specs' to v0.27	MERGED
9474	Fix cache hash on Highlighted spaces	MERGED
9471	Fix cache when changing background image on homepage's Hero's cell	MERGED
9468	Fix background-image URLs with weird characters	MERGED
9465	Fix hardcoded hour in election dashboard	MERGED

9446	Add Markdown linter CI workflow	MERGED
9445	Update gem dependencies	MERGED
9444	Improve testing docs	MERGED
9441	Add Javascript workflow for Github Actions	MERGED
9439	Fix deprecations in README	MERGED
9433	Improve i18n-tasks error messages	MERGED
9429	Add official blog posts	MERGED
9427	Return 404 when there isn't an initiative	MERGED
9418	Update gems dependencies	MERGED
9417	Update NPM dependencies	MERGED
9395	Bump letter_opener_web from 1.3 to 2.0	MERGED
9381	Fix proposals creation with Participatory Texts	MERGED
9380	Bump simplecov to 0.21.2 and simplecov-cobertura to 2.1.0	MERGED
9376	Return 404 when there isn't a voting in elections_log	MERGED
9375	Return 404 when there isn't a question	MERGED
9374	Return 404 when there isn't a consultation	MERGED
9373	Add donation instructions	MERGED
9372	Change docs to use decidim_system:create_admin command	MERGED
9370	Fix errors when building documentation	MERGED
9359	Add missing translation keys proposals import and proposals picker	MERGED
-		

## Annex III: Issues created in the main repository

Table showing the relationship of the issues created in the main repository by the Association collaborator<sup>9</sup>, Andrés Pereira de Lucena, through his GitHub profile (andreslucena).

Issue ID	Tittle	State	Tags
9914	Exception in PushNotificationPresenter (undefined method `reported_content_url')	CLOSED	type: bug, module: core, contract: PWA
9859	Ask for old password when changing password	OPEN	type: bug, team: security, good first issue, hacktoberfest
9851	Translations missing on admin log	CLOSED	type: bug, module: admin, good first issue, hacktoberfest, module: conferences
9571	Broken pagination CSS	OPEN	type: bug, module: core, module: admin, release: v0.28, contract: redesign
9569	Cookie consent doesn't save between browsers' sessions	CLOSED	type: bug, release: v0.27, contract: GDPR
9561	Fix mobile notifications view design	CLOSED	type: bug, contract: PWA, release: v0.27
9560	Push notifications don't escape characters correctly	CLOSED	type: bug, contract: PWA, release: v0.27
9559	No favicon/app icon in the Push Notification	CLOSED	type: bug, contract: PWA, release: v0.27
9558	Notifications link doesn't work on Push Notifications	CLOSED	type: bug, contract: PWA, release: v0.27
9485	Flaky spec on comments_examples.rb	CLOSED	module: comments, flaky spec
9398	Relative links are handled as external links in WYSIWYG	OPEN	type: bug, module: core, module: admin

<sup>&</sup>lt;sup>9</sup> Disponible a <u>https://github.com/decidim/decidim/issues</u>

## Annex IV: Commented Issues in the main repository

Table showing the relationship of the commented issues within the main repository<sup>10</sup> by the Association employee, Andrés Pereira de Lucena, through his GitHub profile (andreslucena).

Issue ID	Tittle	State	Tags
9923	Not translated attributes when editing my initiative	OPEN	type: bug, module: initiatives
9922	Initiative edit form fields are different from creation form	OPEN	type: bug, module: initiatives
9914	Exception in PushNotificationPresenter (undefined method `reported_content_url')	CLOSED	type: bug, module: core, contract: PWA
9912	Fixed update markers on the map	OPEN	type: bug, status: 🗙 blocked, module: proposals, type: fix
9897	Invite Existing user to Participatory space private participant or to Assembly	OPEN	type: bug, module: core, module: admin
9882	The i18n locales selector is showing a dropdown with 3 languages	CLOSED	type: bug, module: system, hacktoberfest
