

#### A digital platform for participatory citizen science

Jesús Cerquides<sup>1</sup>, Maite López-Sánchez<sup>2</sup>

<sup>1</sup> Artificial Intelligence Research Institute (IIIA-CSIC)

<sup>2</sup> University of Barcelona

Decidim Fest, Oct 22<sup>nd</sup> 2021

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 872944

# **Crowd4SDG Project Mission**

#### Initiate youth-led crowdsourcing/citizen science projects that:

- Generate grassroots innovation for the SDGs
- Track progress towards the SDGs

Climate Hazards and Cities

Climate Resilience and Gender

Climate Adaptation and Rights

# Citizen science: scientific research with the public

## Four levels of participation in citizen science

#### Level 4 'Extreme Citizen Science'

• Collaborative science – problem definition, data collection and analysis

#### Level 3 'Participatory science'

Participation in problem definition and data collection

#### Level 2 'Distributed Intelligence'

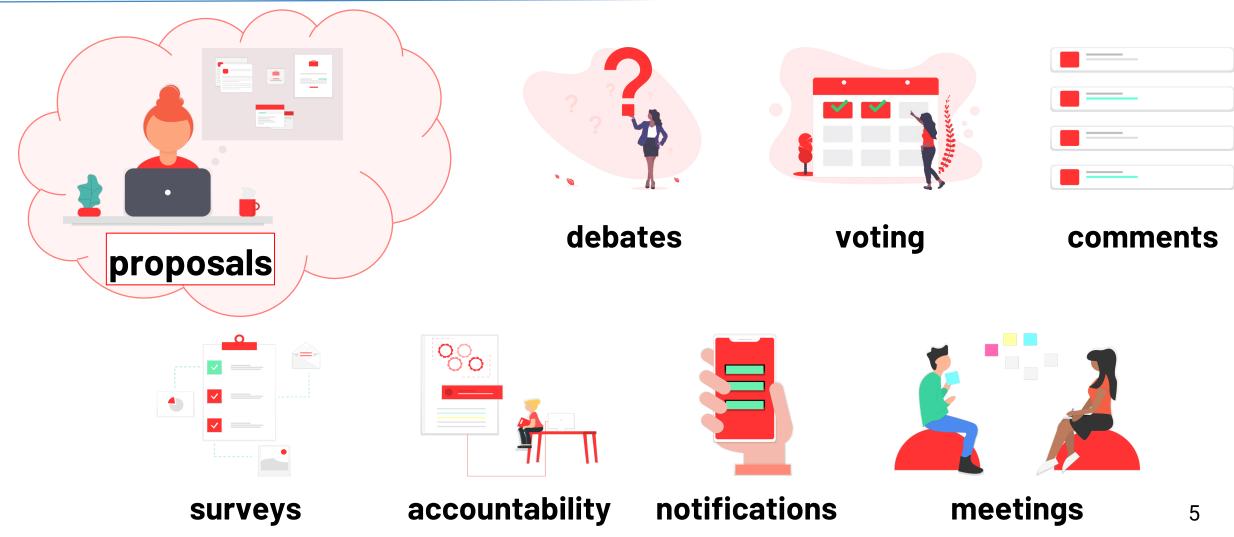

- Citizens as basic interpreters
- Volunteered thinking

#### Level 1 'Crowdsourcing'

- Citizens as sensors
- Volunteered computing

# Need for self-organization

# Need for self-organization

# Some projects on decidim4CS

**crowdvid-19** by the students from University of Geneve

identifying evidences in the scientific literature about children and Covid19 vaccination

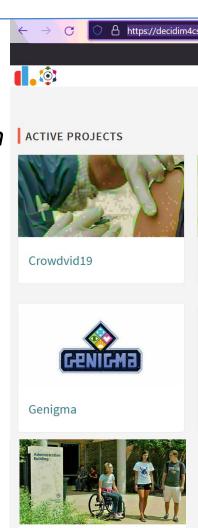

**20 participants** opened **11** different **debates** (one per research paper)

genigma by CNAG-CRG

a game where citizens and scientists collaborate in building the reference genome to be used at the Barcelona International Youth Science Challenge (last-minute cancellation due to covid-19 outbreak)

GTI-Infrastructure Disability by the students from University of Geneve

working towards a more inclusive educational infrastructure

GTI-Infrastructure Disability
